Product Overview

The RG-SF2920 series switches in Ruijie Networks' Simplified Optical Ethernet (SOE) solution offer an alternative for transmitting data to terminals through optical links. These switches are versatile and can be deployed in various environments, including smart classrooms, multimedia classrooms, offices, clinic wards, mini branches, and other locations with wiring limitations. They cater to the needs of customers in the education, medical, enterprise, and commercial sectors. The switches provide convenient access and ultra-high bandwidth for a multitude of Internet of Things (IoT) devices and other IP-enabled devices such as wireless cameras, ultra HD digital video cameras, and intelligent electronic bedside screens.

The RG-SF2920 offers the following benefits:

- Protecting the service environment: The entire series adopts a heat dissipation architecture with excellent performance. The 4/8/16-port devices use fanless design, ensuring silent operation without causing noise interference in indoor environments such as classrooms and offices.
- The 1G/2.5G/5G/10G ports on 4/8/16-port devices support PoE/PoE+, providing convenient access for mass terminals.
- Compact design with the support for various installation modes: The devices can be flexibly and rapidly installed in various indoor scenarios.
- Dual-network design on one device: The 4/8-port 1000M devices can be equipped with a dual-network expansion module, allowing for unified deployment, installation, and management of two physically isolated networks on one device.
- Enterprise-class high reliability is a fundamental requirement for seamless integration between devices and service scenarios. The innovative power grid fluctuation resistance design protects against interference from the municipal power grid on devices and services. Additionally, the wide temperature design, built-in power supply, 8 kV surge protection on ports, and overall metal housing design ensure stability and reliability in various indoor scenarios.
- The switches support Ruijie SOE solution. They inherit the Ethernet O&M mode and provide quasi-cable optical fiber O&M and locating functions, enabling seamless transition between conventional Ethernet architecture and all-optical networking architecture in network center O&M. Furthermore, these switches offer intelligent O&M features throughout the lifecycle, including plug-and-play deployment and security control.

| Product Highlights

- 8 kV Rich port options, supporting PoE+ power supply, with port surge protection exceeding 8 kV
- Compact design, enabling flexible and quick installation, while maintaining quiet operation with less power consumption
- 10GE uplink ports for faster switching as needed
- Enhanced reliability with metal housing, metal network ports, and independent optical module design for stable data forwarding
- Leveraging O&M of Ruijie SOE solution, ensuring simple and effective management, as well as high network reliability and security

| Product Features

Ruijie SOE Solution

Ruijie SOE solution is Ruijie Networks' next-generation network architecture designed for application scenarios in education, travel, office, and other campuses. It leverages the deployment of fiber to the home (FTTH) and Ethernet, along with software-defined networking (SDN) technology. This solution offers high-bandwidth, low-latency, flexible, and easy-to-manage network infrastructure to support campus services in the era of the Internet of Everything (IoE). It enables seamless service evolution in the coming decade while ensuring an exceptional user experience and valuable investment.

The switch serves as an end device in an optical link, providing accessible connectivity, service expansion, and high-bandwidth services for indoor terminals. To better support the all-optical network and seamlessly integrate with the service environment, the switch offers the following features:

- Quiet operation
- Dual-network design on one device
- Green energy saving, promoting sustainability
- Compact design with multiple installation modes, enabling flexible and rapid installation while demanding minimal installation requirements
- Enterprise-class high availability
- Advanced security features, including robust security protection policies that allow the device to be deployed in indoor environments instead of limited to dedicated equipment rooms
- Intelligent O&M, with effortless online deployment requiring zero configuration or replacement, along with simplified cable and fiber O&M processes

Quiet Operation

The RG-SF2920 series switches incorporate a cutting-edge hardware architecture, providing quiet operation. The 4/8/16-port devices are designed without fans, ensuring a noise level below 35 dB. For a tranquil environment, a sound level between 30 dB and 40 dB is considered ideal.

Despite the absence of fans for cooling, these switches feature a wide temperature design that efficiently dissipates heat and reduces temperatures. As a result, they can function seamlessly in both open and confined spaces with ambient temperatures ranging from 0°C to 45°C. This versatility enables placement in various locations, such as closed weak-current boxes embedded within walls, podium multimedia boxes accommodating other central control devices, as well as cabinets in equipment rooms and classrooms within the engineering training center.

Dual-Network Design on One Device

Within the SF2920 series switches, the 4/8-port 1000M switches offer dual-network expansion modules, allowing for management of two separate networks on a single device. This feature benefits various industries, such as enabling an office network and intelligent private network in education or connecting Intranet and Intranet in the medical industry. During data transmission, the switch and expansion module connect to two distinct physical networks through independent channels, typically optical fibers. While managing power supply, the expansion module draws power from the switch, ensuring unified power management for both the switch and expansion module.

In terms of installation and deployment, there is no need for the deployment of two sets of devices and accessories within indoor environments.

Green Energy Saving, Promoting Sustainability

In response to China's initiative for green energy conservation, Ruijie has conducted a thorough investigation into the issues of noise and energy consumption in conventional switches. As a result, advanced energy-saving design elements have been seamlessly integrated into the RG-S2920 series switches. These switches effectively eliminate the disruptive noise commonly associated with office deployments, as well as the excessive energy consumption caused by the widespread use of access devices.

The RG-SF2920 series switches incorporate cutting-edge energy-saving circuitry, low power consumption design, and carefully selected components to ensure significant energy conservation. The ports of these switches adhere to the Energy Efficient Ethernet (EEE) standard, reducing device component power consumption by 20%. Additionally, this series of switches comply with the Restriction of Hazardous Substances (RoHS) standard for materials and security.

Compact Design with Multiple Installation Modes

Conventional switches are typically rack-mounted and can only be installed in standard cabinets found in weak-current equipment rooms. If they are to be deployed indoors, there are stringent installation requirements to adhere to. However, the switches feature compact design and elegant white design that meet aesthetic preferences of users in various indoor environments.

The switches come equipped with mounting brackets, enabling flexible installation options. They can be installed in standard cabinets, custom cabinets (weak-current boxes), mounted on walls, placed in podium multimedia boxes, or even positioned under workbenches.

Enterprise-class High Availability

All models of these switch series are constructed with sturdy metal housing and metal network ports. These durable housing provides effective protection against external mechanical collisions, ensuring that the devices operate smoothly.

The industrial-grade device selection further enhances capabilities of these devices. They can withstand temperatures up to 15°C higher than common devices, thereby extending their service life and increasing Mean Time Between Failures (MTBF) by 50% compared to conventional devices.

Moreover, they are equipped with innovative designs that safeguard against power grid fluctuations and surges. This design effectively defends against radio wave interference and provides surge protection of up to 8 kV on the ports. As a result, it ensures stability and reliability of the devices.

RG-SF2920U-4GT1MS-P, RG-SF2920U-8GT1MS, and RG-SF2920U-8GT1MS-P:

These switch models support the Rapid Spanning Tree Protocol (RSTP), which guarantees fast convergence, improves fault tolerance, ensures stable network operation and load balancing of links, utilizes network channels efficiently, and provides redundant link utilization.

RG-SF2920-8GT2MG2XS, RG-SF2920-16GT2MG2XS, RG-SF2920-16GT2SFP, RG-SF2920-16GT2SFP-P, RG-SF2920-8GT2MG2XS-P, and RG-SF2920-16GT2MG2XS-P:

These switch models support the Spanning Tree Protocol (STP), RSTP, and Multiple Spanning Tree Protocol (MSTP), which guarantee fast convergence, improve fault tolerance, ensure stable network operation and load balancing of links, utilize network channels efficiently, and provide redundant link utilization.

They also support the Rapid Link Detection Protocol (RLDP), which can quickly detect the connectivity status of links and unidirectional status of fiber links. They also support loop detection on ports to prevent network failures caused by loops formed by devices such as incorrectly connected hubs on ports.

Advanced Security Features

The RG-SF2920 series switches feature a unique hardware CPU protection mechanism called the CPU Protection Policy (CPP). This mechanism intelligently classifies data traffic directed to the CPU, processes it based on queue priority, and enforces bandwidth rate limiting as needed. By doing so, it effectively safeguards the CPU against unauthorized traffic occupancy, malicious attacks, and resource consumption. As a result, it ensures the CPU's security, thereby providing comprehensive protection for the switches.

To safeguard the network infrastructure, the RG-SF2920 series switches employ the innovative Network Foundation

Protection Policy (NFPP) technology. This technology rate-limits ARP packets, ICMP requests, DHCP requests, and other network traffic. Packets that exceed these thresholds are automatically discarded, and attack behaviors are identified and isolated, ensuring the protection of essential network resources. Consequently, the network remains secure, and its stability is guaranteed.

With DHCP snooping, the RG-SF2920 series switches only accept DHCP Response messages from trusted ports, effectively preventing unauthorized DHCP server spoofing. By dynamically monitoring ARP packets, inspecting users' IP addresses, and discarding invalid packets that do not match binding entries, the switches efficiently thwart ARP spoofing and source IP address spoofing incidents. This ensures enhanced network security and mitigates potential risks.

Intelligent O&M

The RG-SF2920 series switches offer seamless device plug-and-play functionality, simplifying network deployment and maintenance. Users can independently perform

O&M without the need for professional assistance. Upon connecting to the network, the devices automatically obtain IP addresses through DHCP. They then initiate a self-test process to retrieve preconfigured settings tailored to specific areas, services, and devices. This includes the configuration of ports, such as VLANs, security measures, and manageability features. This streamlined approach minimizes the required workload and eliminates the need for extensive professional knowledge. Moreover, in case of device malfunction or expiration of its service life, the zero-touch replacement technology seamlessly identifies and adjusts to the replacement model. The new device is capable of synchronizing with the port configuration and services of its predecessor effortlessly.

In a network employing all-optical links, the quantity of optical modules and the complexity of O&M exceed those found in networks built using Ethernet cables. To address this, the SOE solution provides optical module and optical link alarms, along with convenient O&M prompts. The alarm locations can be visualized within the network topology, greatly facilitating fault detection and enabling efficient management and O&M practices.

	Voice VLAN
	Private VLAN
	MAC VLAN MAC address-based, port-based, protocol-based, and IP subnet-based VLAN assignment
	GVRP
	Basic QinQ and flexible QinQ
	STP (IEEE 802.1.d), RSTP (IEEE 802.1w), and MSTP (IEEE 802.1s)
	ERPS (G.8032) with switching time ≤ 50 ms
LLDP/LLDP-MED	
IP service	DHCP server, DHCP client and DHCP snooping
	DNS
	DHCPv6 client, DHCPv6 relay, and DHCPv6 snooping
	Neighbor Discovery (ND)
IP routing	Static routing
	Static blackhole routing
	RIP v1/v2 and RIPng

Feature	RG-SF2920-8GT2MG2XS, RG-SF2920-16GT2MG2XS, RG-SF2920-16GT2SFP, RG-SF2920-16GT2SFP-P, RG-SF2920-8GT2MG2XS-P, RG-SF2920-16GT2MG2XS-P
IP routing	OSPFv2 and OSPFv3
	GR
Multicast	IGMPv1/v2/v3 snooping
	IGMP fast leave
ACL and QoS	Standard IP ACLs (IP-based hardware ACLs)
	Extended IP ACLs
	Extended MAC ACLs
	Expert-level ACLs
	ACL80 and IPv6 ACLs
	ACLs on Layer 2 and Layer 3 interfaces
	Applying ACLs globally (hardware ACLs based on flexible combinations of the VLAN ID, Ethernet type, MAC address, IP address, TCP/UDP port number, protocol type, and time range)
	ACL redirection
	Traffic classification based on 802.1p priorities, DSCP priorities, and IP precedences
	Congestion management: SP, WRR, DRR, WFQ, SP+WRR, SP+DRR, SP+WFR, and SP+WFQ
	Congestion avoidance: tail drop
	Rate limiting based on the inbound or outbound interface
Security	RADIUS and TACACS+
	RADIUS authentication and authorization
	IEEE 802.1X authentication, MAC address bypass (MAB) authentication, and interface-based and MAC address-based 802.1X authentication

Feature	RG-SF2920-8GT2MG2XS, RG-SF2920-16GT2MG2XS, RG-SF2920-16GT2SFP, RG-SF2920-16GT2SFP-P, RG-SF2920-8GT2MG2XS-P, RG-SF2920-16GT2MG2XS-P
Security	Web authentication
	Hypertext Transfer Protocol Secure (HTTPS)
	SSHv1.5 and SSHv2.0
	Global IP-MAC binding
	ICMP (discarding ICMP packets of which the rate exceeds the threshold on an interface)
	Port security
	BPDU guard
	Filtering of invalid MAC addresses
	Broadcast storm suppression
	Hierarchical management of administrators and password protection
	IP source guard
	ARP spoofing prevention
	CPP and NFPP
	DAI Portal authentication Login authentication and password security Unknown unicast suppression
Various attack defense functions including NFPP, ARP anti-spoofing, DHCP/DHCPv6 attack defense, ICMP attack defense, ND attack defense, IP scanning attack defense, and customizing attack defense packet types	
Reliability	REUP
	Rapid Link Detection Protocol (RLDP), Layer 2 link connectivity detection, unidirectional link detection, and VLAN-based loop control
	Load balancing LACP dynamic aggregation The LACP priority, negotiation mode, and maximum number of ports that can be aggregated can be configured. Cross-VSU aggregate interface
	DLDP

Feature	RG-SF2920-8GT2MG2XS, RG-SF2920-16GT2MG2XS, RG-SF2920-16GT2SFP, RG-SF2920-16GT2SFP-P, RG-SF2920-8GT2MG2XS-P, RG-SF2920-16GT2MG2XS-P
Reliability	IPv4 VRRP v2/v3, IPv6 VRRPv3
	GR for OSPF
NMS and Maintenance	SPAN, RSPAN and ERSPAN Flow- and VLAN-based SPAN 1:1 mirroring, N:1 mirroring, and 1:N mirroring Cross-device traffic mirroring
	sFlow (network detection technology based on packet sampling, which is mainly used for traffic statistics and analysis in heavy-traffic scenarios)
	NTP and SNTP
	FTP and TFTP
	SNMP v1/v2c/v3
	RMON (1, 2, 3, 9)
	CLI (Telnet/console), Syslog/debugging, and web
	Various types of RMON groups, including event groups, alarm groups, history groups, and statistics groups, as well as private alarm extension groups RMON used to implement Ethernet statistics, historical statistics, and alarm functions
	CWMP
	OpenFlow Special 1.0/1.3
PoE	RG-SF2920-16GT2SFP-P, RG-SF2920-8GT2MG2XS-P, and RG-SF2920-16GT2MG2XS-P: <ul style="list-style-type: none"> ● RJ45 ports in compliance with IEEE 802.3af (15.4 W) and IEEE 802.3at (30 W) ● Automatic and energy-efficient power supply management modes ● Warm start to implement uninterrupted power supply ● Port priority

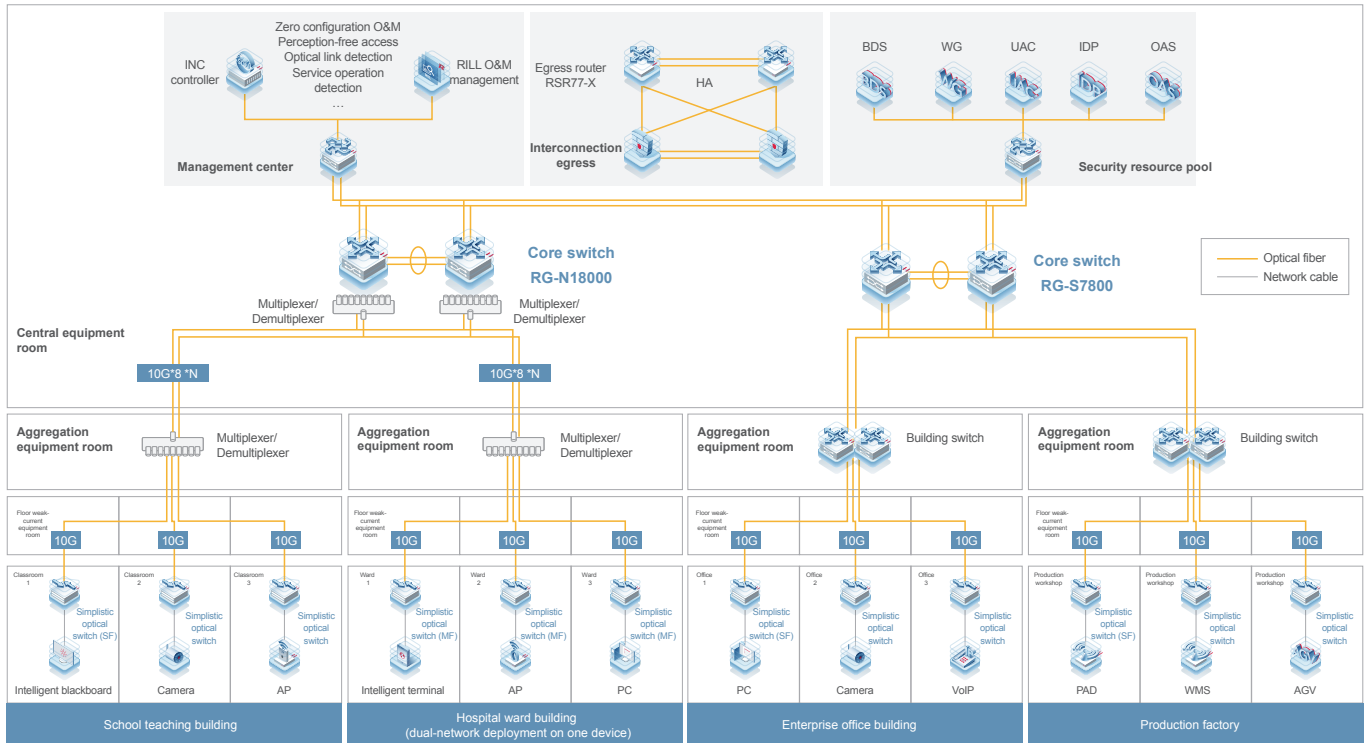

Protocol Compliance

Organization	Standards and Protocol

Typical Applications

The RG-SF2920 series switches serve as indoor switches in the SOE solution. The following figure shows the typical application topology.

Ordering Information

Switches

Model	Description
RG-SF2920U-8GT1MS	8 x 10/100/1000BASE-T ports, 1 x 1GE/2.5GE SFP port, fixed single AC power supply
RG-SF2920U-4GT1MS-P	4 x 10/100/1000BASE-T ports, 1 x 1GE/2.5GE SFP port, fixed single AC power supply; RJ45 ports 1 to 4 support PoE/PoE+; maximum PoE output power: 45 W
RG-SF2920U-8GT1MS-P	8 x 10/100/1000BASE-T ports, 1 x 1GE/2.5GE SFP port, fixed single AC power supply; RJ45 ports 1 to 8 support PoE/PoE+; maximum PoE output power: 125 W
RG-SF2920-8GT2MG2XS	8 x 10/100/1000BASE-T ports, 2 x 1G/2.5GBASE-T ports, 2 x 1GE/10GE SFP+ ports, fixed single AC power supply

Model	Description
RG-SF2920-16GT2MG2XS	16 x 10/100/1000BASE-T ports, 2 x 1G/2.5GBASE-T ports, 2 x 1GE/10GE SFP+ ports, fixed single AC power supply
RG-SF2920-16GT2SFP	16 x 10/100/1000BASE-T ports, 2 x 1GE SFP ports, fixed single AC power supply
RG-SF2920-16GT2SFP-P	16 x 10/100/1000BASE-T ports, 2 x 1GE SFP ports, fixed single AC power supply; RJ45 ports 1 to 8 support PoE/PoE+; maximum PoE output power: 125 W
RG-SF2920-8GT2MG2XS-P	8 x 10/100/1000BASE-T ports, 2 x 1G/2.5G/5GBASE-T ports, 2 x 1GE/10GE SFP+ ports, fixed single AC power supply; RJ45 ports 1 to 8 support PoE/PoE+; maximum PoE output power: 125 W
RG-SF2920-16GT2MG2XS-P	16 x 10/100/1000BASE-T ports, 2 x 1G/2.5G/5GBASE-T ports, 2 x 1GE/10GE SFP+ ports, fixed single AC power supply; RJ45 ports 1 to 8 support PoE/PoE+; maximum PoE output power: 125 W

Note:

- 1 x 1GE/2.5GE SFP port supports 1GE SFP transceivers, 2.5GE SFP transceivers.
- 2 x 1GE/10GE SFP+ ports support 1GE SFP transceivers, 10GE SFP+ transceivers.

Optical Transceivers and Cables

1GE

Model	Description
Mini-GBIC-GT	1000BASE-X to 1000BASE-T, copper SFP transceiver, RJ45, 100 m over Cat 5e/6/6a The port needs to be configured with auto-negotiation
MINI-GBIC-SX-MM850	1000BASE-SX, SFP transceiver, 850 nm, Duplex LC, 500 m over MMF
MINI-GBIC-LX-SM1310	1000BASE-LX, SFP transceiver, 1310 nm, Duplex LC, 10 km over SMF
MINI-GBIC-LH40-SM1310	1000BASE-LH, SFP transceiver, 1310 nm, Duplex LC, 40 km over SMF
MINI-GBIC-ZX80-SM1550	1000BASE-ZX, SFP transceiver, 1550 nm, Duplex LC, 80 km over SMF
GE-SFP-LX20-SM1310-BIDI	1000BASE-LX, SFP transceiver, TX1310/RX1550, BiDi LC, 20 km over SMF
GE-SFP-LX20-SM1550-BIDI	1000BASE-LX, SFP transceiver, TX1550/RX1310, BiDi LC, 20 km over SMF
GE-SFP-LX03-SM1310-BIDI-I	1000BASE-LX, SFP transceiver, TX1310/RX1550, BiDi LC, 3 km over SMF
GE-SFP-LX03-SM1550-BIDI-I	1000BASE-LX, SFP transceiver, TX1550/RX1310, BiDi LC, 3 km over SMF

Note: BiDi transceivers must be used in pairs. If one end uses GE-SFP-LX20-SM1310-BIDI, the other end must use GE-SFP-LX20-SM1550-BIDI.

2.5GE

Model	Description
2.5G-SFP-LX03-SM1310-BIDI-I	2.5GBASE-LX, SFP transceiver, TX1310/RX1550, BiDi LC, 3 km over SMF
2.5G-SFP-LX03-SM1550-BIDI-I	2.5GBASE-LX, SFP transceiver, TX1550/RX1310, BiDi LC, 3 km over SMF

10GE

Model	Description
XG-SFP-SR-MM850	10GE LC module (62.5/125 μm: 33 m (108.27 ft.); 50/125 μm: 66 m (216.54 ft); transmission for 300 m (984.25 ft.) when modal bandwidth is 2000 MHz*km), applicable to SFP+ ports
XG-SFP-LR-SM1310	10GE LC interface module (1310 nm), 10 km (6.21 miles), applicable to SFP+ ports
XG-SFP-ER-SM1550	10GE LC interface module (1550 nm), 40 km (24.85 miles), applicable to SFP+ ports
XG-SFP-AOC1M	10GE SFP+ optical cable, 1 m (3.28 ft.), including one cable and two interface modules
XG-SFP-AOC3M	10GE SFP+ optical cable, 3 m (9.84 ft.), including one cable and two interface modules
XG-SFP-AOC5M	10GE SFP+ optical cable, 5 m (16.40 ft.), including one cable and two interface modules

CWDM

Model	Description
GE-SFP-LR(A1-8)-H	1000BASE-LR, access switch-side group of 8 SFP CWDM transceivers, 8 different wavelengths for 8 access devices, Duplex LC, 10 km over SMF, operating temperature of 0°C to 70°C (32°F to 158°F)
GE-SFP-LR(A1-8)-H-E	1000BASE-LR, access switch-side group of 8 SFP CWDM transceivers, 8 different wavelengths for 8 access devices, Duplex LC, 10 km over SMF, operating temperature of 0°C to 85°C (32°F to 185°F)
MG-SFP-LR(A1-8)-H	2.5GBASE-LR, access switch-side group of 8 SFP CWDM transceivers, 8 different wavelengths for 8 access devices, Duplex LC, 10 km over SMF, operating temperature of 0°C to 70°C (32°F to 158°F)
MG-SFP-LR(A1-8)-H-E	2.5GBASE-LR, access switch-side group of 8 SFP CWDM transceivers, 8 different wavelengths for 8 access devices, Duplex LC, 10 km over SMF, operating temperature of 0°C to 85°C (32°F to 185°F)
XG-SFP-LR(A1-8)-H	10GBASE-LR, access switch-side group of 8 SFP CWDM transceivers, 8 different wavelengths for 8 access devices, Duplex LC, 10 km over SMF, operating temperature of 0°C to 70°C (32°F to 158°F)
XG-SFP-LR(A1-8)-H-E	10GBASE-LR, access switch-side group of 8 SFP+ CWDM transceivers, 8 different wavelength for 8 access devices, Duplex LC, 10 km over SMF, operating temperature of 0°C to 85°C (32°F to 185°F)

Package Contents

Item	RG-SF2920U	RG-SF2920
Chassis	1	1
Power cord	1	1
Grounding wire	1	1
M4x6 cross recessed countersunk head screw, GB819-85	/	6
M4x7 cross recessed countersunk head screw, GB819-85	6	/
Fixed frame	2	2
<i>Installation Guide for the Fixing Rack, Network Product Warranty Manual and Hazardous Substance Statement</i>	1	1
<i>Fixing frame installation positioning paper</i>	1	1
Ruijie Networks Access Product Management Software	1 (pre-installed)	1 (pre-installed)

Warranty

For more information about warranty terms and period, contact your local sales agency:

- Warranty terms: <https://www.ruijie.com/support/servicepolicy>
- Warranty period: <https://www.ruijie.com/support/servicepolicy/Service-Support-Summary/>

Note: The warranty terms are subject to the terms of different countries and distributors.

More Information
